

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of:

Mitsushi YOSHIOKA

Serial No.: NEW

Group Art Unit: Unassigned

Filed: April 23, 2001

Examiner: Unassigned

For: INJECTION MECHANISM OF INJECTION MOLDING MACHINE

PRELIMINARY AMENDMENT

Assistant Commissioner for Patents

Washington, D.C. 20231

Sir:

Before examination of the above-identified application, please amend the application as follows:

IN THE CLAIMS

Please AMEND the claims in accordance with the following:

3. (ONCE AMENDED) An injection mechanism of an injection molding machine according to claim 1, wherein the fixed section of each of the linear motors is detachably attached to the outer frame so that electrical elements of the fixed section face electrical elements of the movable section of each of the linear motors, respectively.

4. (ONCE AMENDED) An injection mechanism of an injection molding machine according to claim 1, wherein a hole section is provided in the outer frame, the fixed section of each of the linear motors is constituted of a lid closing the hole section, and electrical elements

of the fixed section of each of the linear motors are fixedly attached to an inside of the lid.

REMARKS

This Preliminary Amendment is submitted to improve the form of the claims as originally-filed.

It is respectfully requested that this Preliminary Amendment be entered in the above-referenced application.

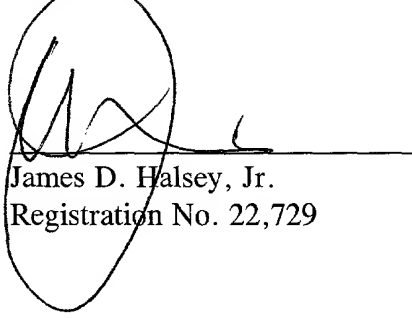

If any further fees are required in connection with the filing of this Preliminary Amendment, please charge same to our Deposit Account No. 19-3935.

Respectfully submitted,

STAAS & HALSEY LLP

VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE CLAIMS

Please **AMEND** the following claims:

3. (ONCE AMENDED) An injection mechanism of an injection molding machine according to claim 1 [or 2], wherein the fixed section of each of the linear motors is detachably attached to the outer frame so that electrical elements of the fixed section face electrical elements of the movable section of each of the linear motors, respectively.

4. (ONCE AMENDED) An injection mechanism of an injection molding machine according to claim 1 [or 2], wherein a hole section is provided in the outer frame, the fixed section of each of the linear motors is constituted of a lid closing the hole section, and electrical elements of the fixed section of each of the linear motors are fixedly attached to an inside of the lid.
